METALICON®

**Due to the current worldwide pandemic more and more office staff find themselves working from their home.**

In the initial lockdown period many adopted a 'make do' approach to their workspace arrangements; working from sofas, dining tables, kitchen worktops and some more unconventional options like ironing boards!

As working at home becomes a long term prospect many employers are investing resources to ensure their staff are able to remain productive at home; by providing appropriate workspace furniture and ergonomic accessories to keep them supported and comfortable.

The following pages contain a few examples of our product ranges that look great and work great at home...

Executive desks

**We have a range of sleek and sophisticated single desk options that work great in a home environment, whether in a separate dedicated office or an open plan layout, blending in with your existing living space style.**

An attractive feature of Air desks is the thin profile metal legs which convey a sense of lightness whilst maintaining stability and durability,

The Air executive range offers concealed hooks, cable ports, storage and drawers, revealed at a touch add the finishing touches to the sleek, sophisticated and weightless feel.

The Formetiq® Alto sit/stand desks - together with the Easy, Active and Motion desks from Narbutas - offer advanced control systems including bluetooth enabled options and anti-collision technology to prevent the desktop hitting objects underneath during adjustment.

# Storage

**In smaller or open plan homes, where workspace is often shared, the ability to tidy away your work out of sight is essential to a healthy work/life balance.**

Our storage ranges can be easily adapted and extended to provide as little or as much storage as you require. Our compact steel and MFC mobile pedestals keep all your desk essentials close at hand whilst the customisable Boxi tower design can accommodate much more including: internal charge sockets, filing, shelves, clothes hooks and even a planter on top!

For larger file and book storage there is a wealth of options available with different colours and finishes of cupboards, cabinets and shelves on offer.

# Seating

**Choosing the right work seating for home isn't just about essential comfort and support, but also style. Some practical office chairs can look ugly and out of place in a domestic setting.**

Most of our seating ranges offer comfort and style together in a robust but contemporary chair design. Formetiq® chairs are simple yet sophisticated and the Narbutas task chair range - together with matching visitor and lounge chairs - offers a huge selection of beautiful Camira and Velito fabric options, some with fashionable two tone designs.

## Ergonomic accessories

**The Metalicon® range of ergonomic office furniture accessories is designed to keep workspaces clear, tidy and comfortable to work at.**

Keep your screens at the appropriate height with the Kardo or Levo monitor arms. Take advantage of the twin or quad screen options or add the universal attachment to use your laptop as a second screen.

Their range of power modules offers everything required both on top of the desk and underneath, linking seamlessly together to reduce cable clutter and save valuable desk space.

The Boost range of desktop modules offers multiple configurations of power sockets, USB-A and USB-C charge and Cat6 data ports in one compact module that sits neatly out of the way at the back of the desk.

Metalicon® have engineered their cable management spines to be incredibly easy to install and adjust. The patented Linx spine can be extended to fit any height workspace - including sit/stand height adjustable desks.
